ANEXO 3

Resultados de los indicadores complementarios de sequía en base a la **precipitación mensual** y a la **precipitación acumulada de los 6 últimos meses**.

UTS 01 Eo

Se incluye a continuación una representación gráfica del valor del índice de estado de los indicadores complementarios en base a la precipitación acumulada de los últimos 6 meses (IE6) y el último mes (IE1).

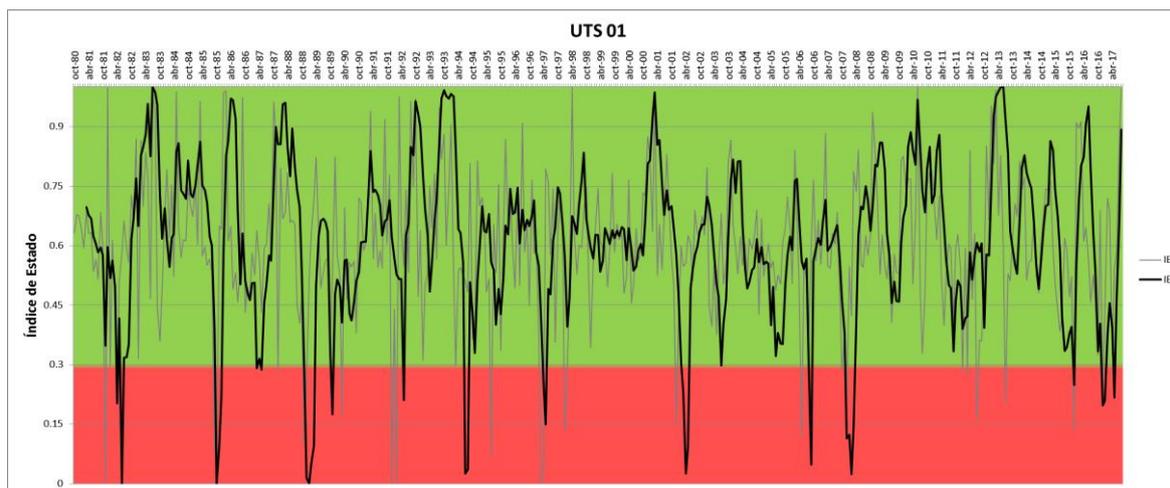

Figura 1. UTS 01: Gráfica temporal del índice de estado complementario a partir de los datos de precipitación acumulados de 3 meses (IE3) y el índice de estado de sequía prolongada a 6 meses (IE6).

Tabla 1. Evolución del Índice de Estado complementario de 6 meses en la UTS 01 para la serie 1980-2018

UTS 02 Porcía

Se incluye a continuación una representación gráfica del valor del índice de estado del indicador complementario en base a la precipitación acumulada de los últimos 6 meses (IE6) y el último mes (IE1).

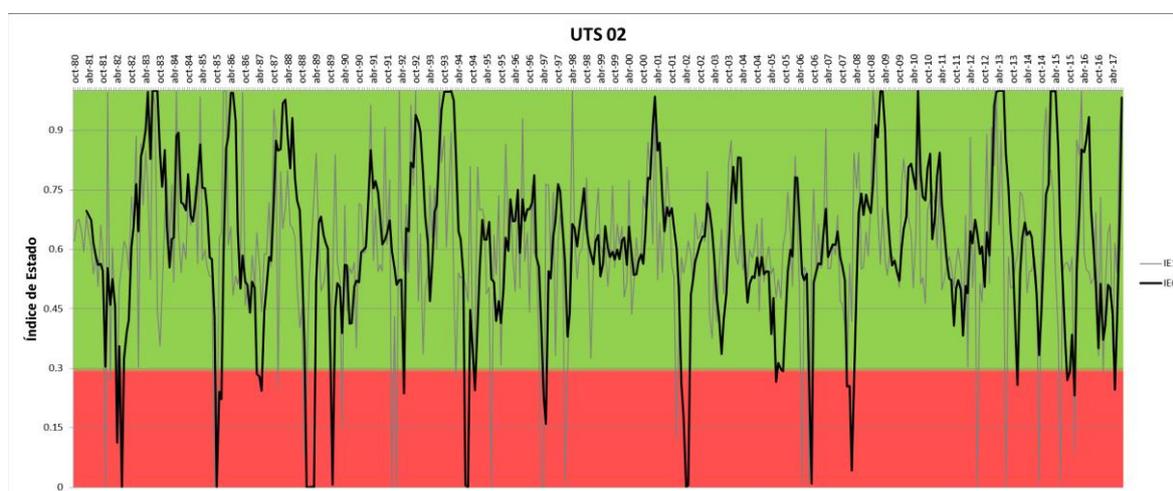

Figura 2. UTS 02: Gráfica temporal del índice de estado complementario a partir de los datos de precipitación de 1 mes (IE1) y acumulados a 6 meses (IE6).

Tabla 8. Evolución del Índice de Estado complementario de 6 meses en la UTS 08 para la serie 1980-2018

UTS 09 Deva

Se incluye a continuación una representación gráfica del valor del índice de estado del indicador complementario en base a la precipitación acumulada de los últimos 6 meses (IE6) y el último mes (IE1).

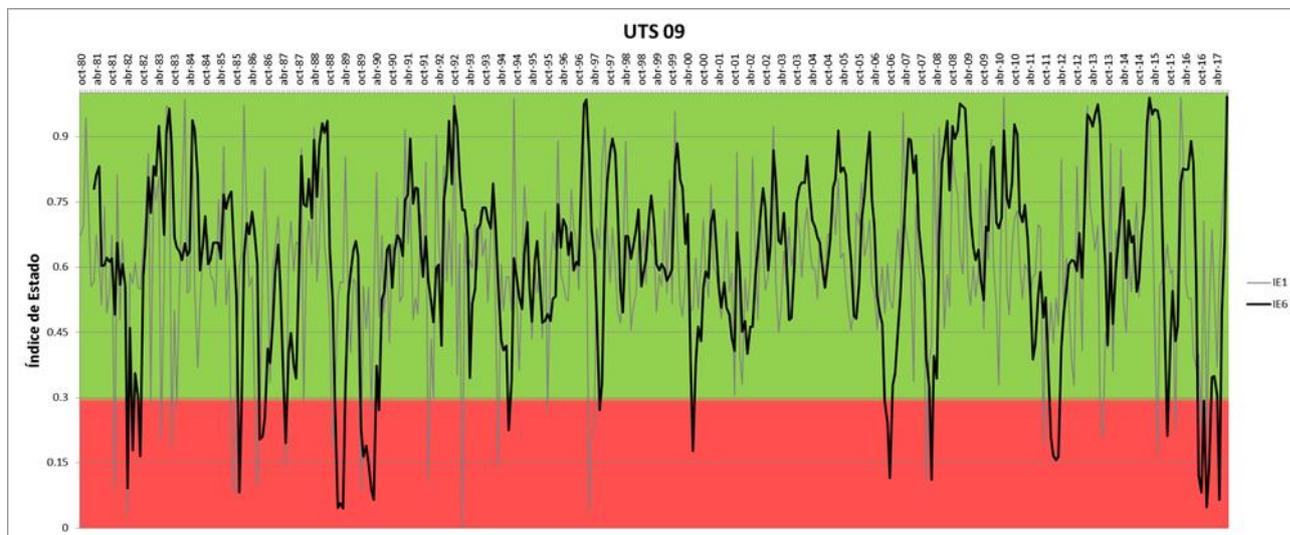

Figura 9. UTS 09: Gráfica temporal del índice de estado complementario a partir de los datos de precipitación de 1 mes (IE1) y acumulados a 6 meses (IE6).

Tabla 10. Evolución del Índice de Estado complementario de 6 meses en la UTS 10 para la serie 1980-2018

UTS 11 Gandarillas

Se incluye a continuación una representación gráfica del valor del índice de estado del indicador complementario en base a la precipitación acumulada de los últimos 6 meses (IE6) y el último mes (IE1).

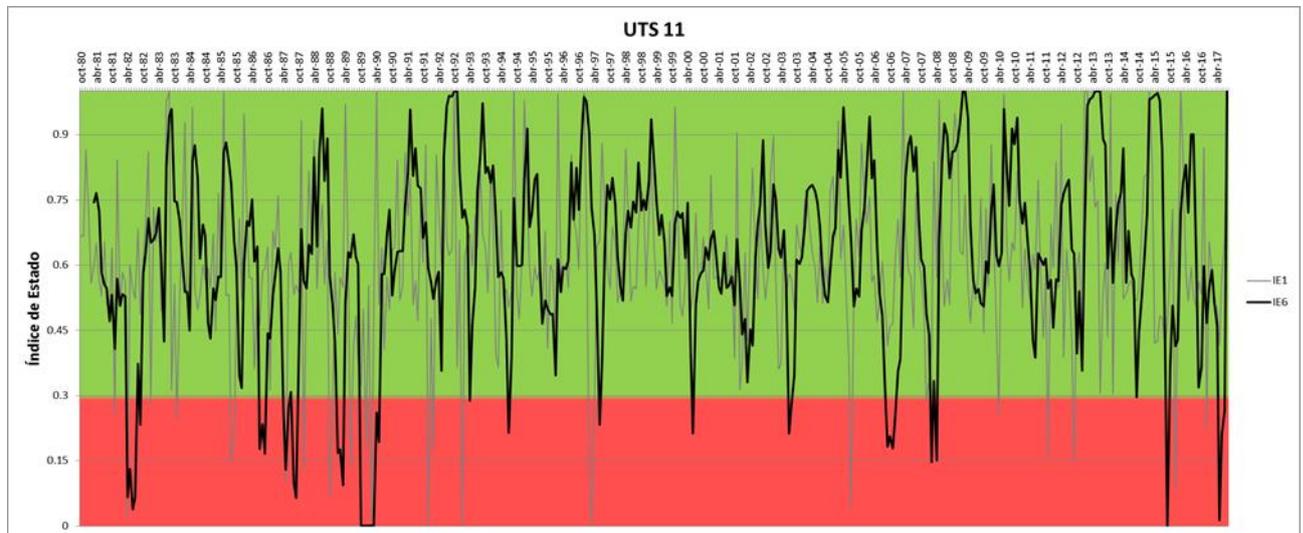

Figura 11. UTS 11: Gráfica temporal del índice de estado complementario a partir de los datos de precipitación de 1 mes (IE1) y acumulados a 6 meses (IE6).
